

Recycling protocol

To comply with the worldwide drive to “separate at source” we ask you please not to put non-recyclable material into the separate compartments which have been provided and labelled for recycling at the depot above the hatchery.

If you are not able to separate your recycling, please place in clear plastic bag – obtainable from the office

Please sort paper and cardboard and place in a clear plastic bag.

Please do not use black plastic bags or leave any food, compostable waste, **disposable nappies** or non-recyclable matter at the recycling site.

**Only combustible garden waste** may be added to the pile for burning. Do not leave plastic bags or treated wood on this pile.

No building rubble, thatching grass and other discarded building material to be left at this site. As in Contractors agreement, this must be removed from the Reserve.

Arrangement may be made with management to remove large landfill items from the Reserve if shareholders are unable to do so on their own.

Thank you
